CG UK Index-Linked Bond Fund

Overview

CG UK Index-Linked Bond Fund Overview

Investment Objective

- To achieve **long-term capital appreciation and income growth** via long-only investment in UK government index-linked bonds
- Simple low-cost approach, no gearing, no short selling
- The fund is actively managed, without reference to a benchmark

Fees and Structure

- Size: **£18m** (launched in October 2023)
- Management Fee: **0.15%** | Total Expense Ratio: 0.32%
- Daily priced Irish UCITS

Investor Profile

The fund has a broad range of investors who typically exhibit the following characteristics:

- A long-term investment horizon
- An aversion to significant short-term losses
- A desire to generate returns that outpace inflation over the long term
- A focus on GBP-denominated returns

CG Asset Management Overview

2001

Founded

Founded in 2001 by Peter Spiller, former Chief Investment Officer and Chief Strategist of Cazenove

£2.6bn

AUM

£2.6bn in assets under management

2

Strategies

Manages two strategies, absolute return and real return, across six funds

12

Employees

Team of 12, based in London

274x

Return

Low-cost offering, with fee reductions regularly reviewed

2

Down Years

Capital Gearing Trust ("CGT") has returned 274x since 1982, with only two down years

CGAM in partnership with our clients

What makes us different?

The firm's founding principles

What does that mean for our clients?

1. The client comes first
2. Don't be greedy
3. Have fun

In turn these principles mean that:

- We have and will close funds to **protect investors**
- We continuously strive to **lower fees**, even on closed funds
- We have **low staff turnover**

Employee owned

- Majority owned by an Employee Ownership Trust, which means we will remain independent
- All portfolio managers are significant shareholders in CGAM

The right incentives

- A significant majority of our own capital is invested in our funds
- Our interests are directly aligned with those of our clients

Investment Process

CG UK Index-Linked Bond Fund

The CG UK Index-Linked Bond Fund's positioning is decided via a top-down process

Index-linked gilts have gone from being uninvestable to good value

UK 10 Year Real Yield (%)

Source: Bloomberg Finance L.P.

The long duration of the index has created large drawdowns which are inappropriate for private investors. The CG fund is a much shorter duration alternative

UK Index-Linked total return index¹⁾

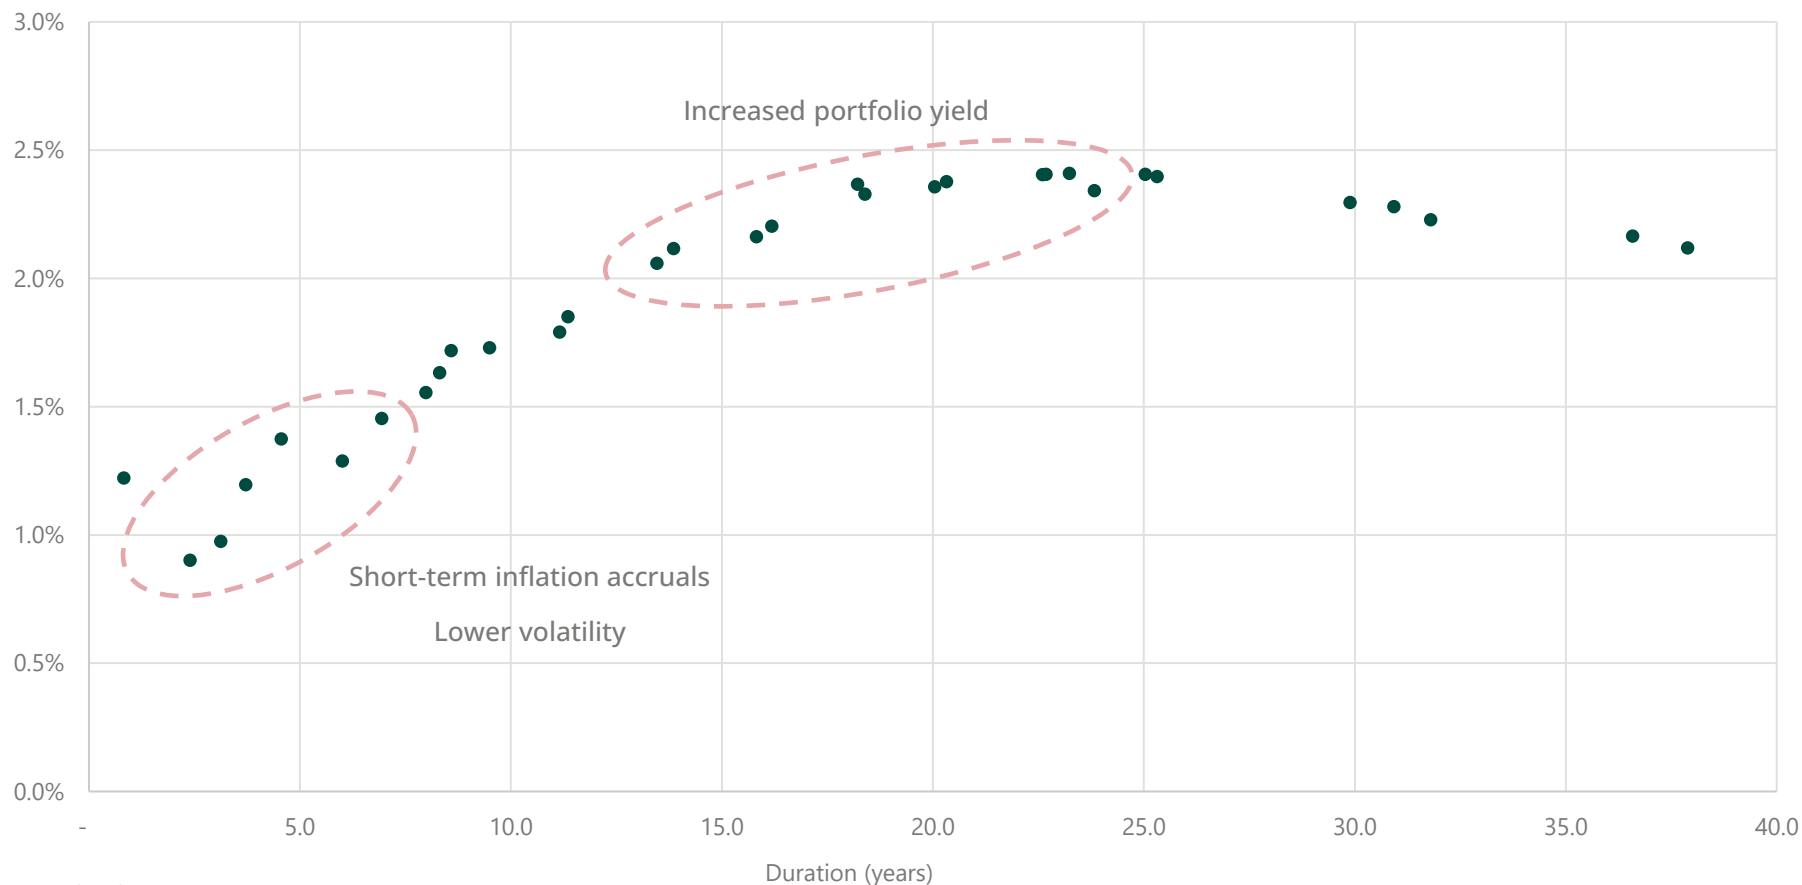

UK Index-Linked Index duration (years)

1. UK Index-Linked Index refers to Bloomberg UK Govt Inflation-Linked All Maturities Total Return Index
Source: Bloomberg Finance L.P.

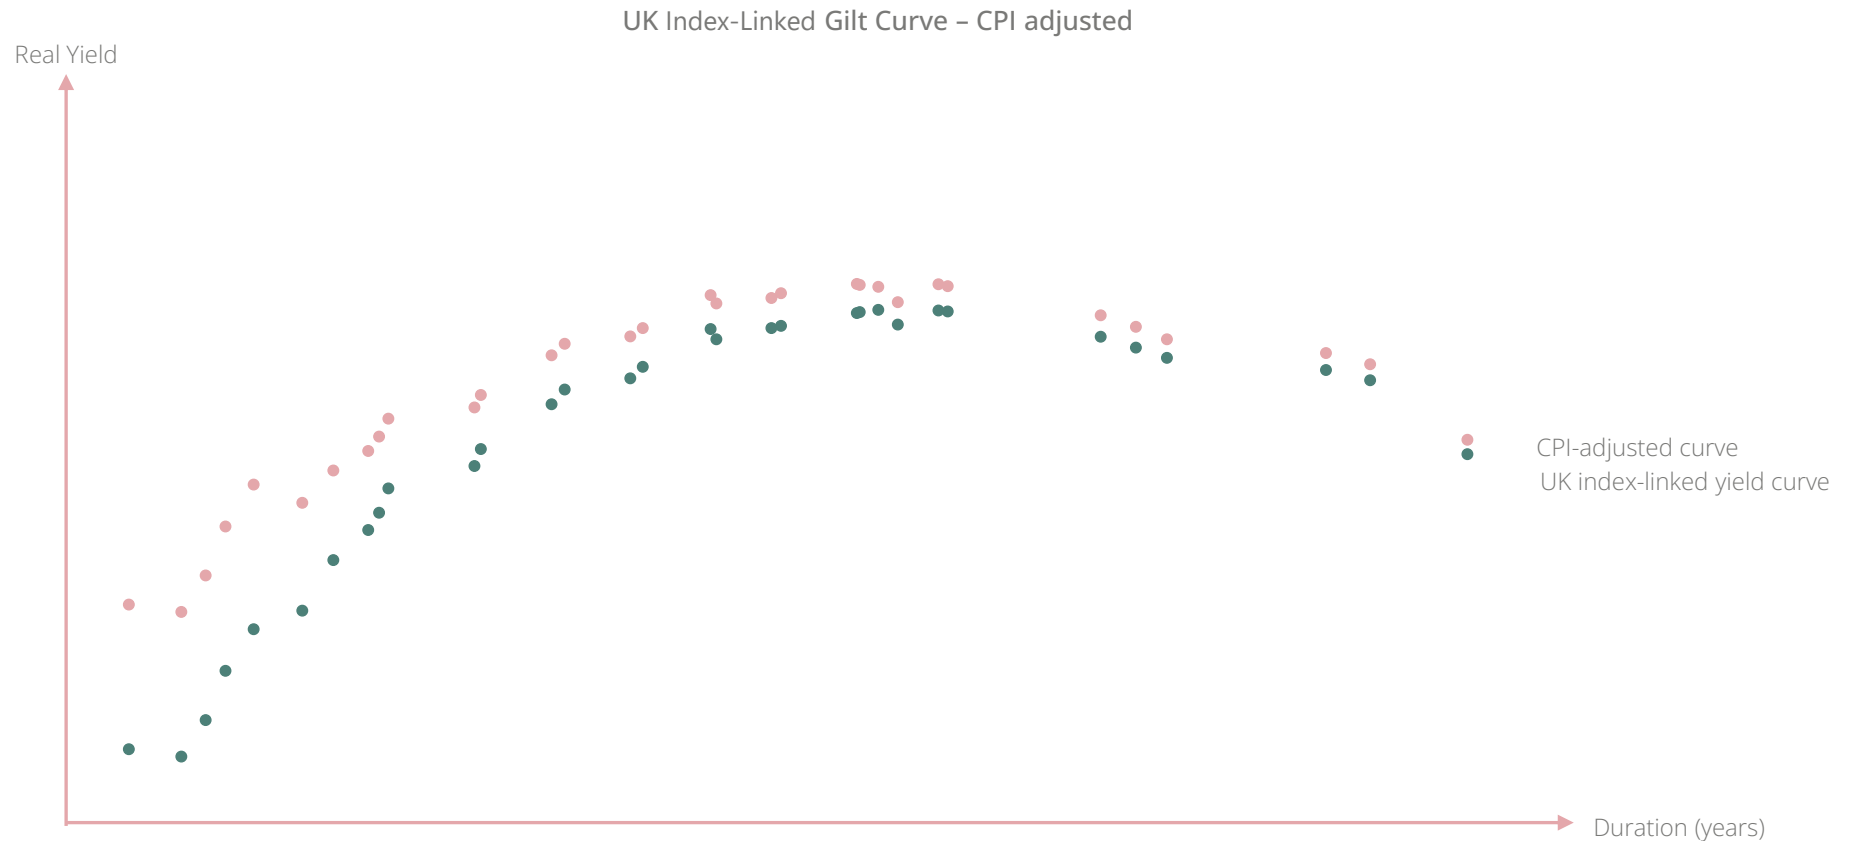

The shape of the yield curve is driven in part by non-fundamental factors which creates opportunities for active management

CPI-adjusted UK index-linked yield curve

Source: Bloomberg Finance L.P.

We then adjust our expected yields for the RPI / CPI wedge

We use a Nelson Siegel Svensson formula to identify individual under and overpriced bonds

$$y = \beta_0 + \beta_1 \frac{(1 - e^{-\frac{\mu}{\tau_1}})}{\frac{\mu}{\tau_1}} + \beta_2 \left(\frac{(1 - e^{-\frac{\mu}{\tau_1}})}{\frac{\mu}{\tau_1}} - e^{-\frac{\mu}{\tau_1}} \right) + \beta_3 \left(\frac{(1 - e^{-\frac{\mu}{\tau_2}})}{\frac{\mu}{\tau_2}} - e^{-\frac{\mu}{\tau_2}} \right)$$

CG UK Index-Linked Bond Fund

Positioning and Returns

The CG UK Index-Linked Bond Fund has duration shorter than the index and its holdings are weighted to the front end of the UK index-linked curve

Portfolio Duration (Years)

Why index-linked?

The role of index-linked bonds in a multi-asset portfolio

Why index-linked?

Index-linked bonds are a fundamental component of a diversified portfolio

Inflation as greatest risk to investor wealth

Against which equities are only a partial hedge.

Significant risk of inflation persistence

The historical record does not support a swift return to the target.

Historic outperformance vs nominal bonds

Such outperformance is likely to persist into the future.

Index-linked bonds perform well when equities do not

The negative stock-bond correlation breaks down in times of high inflation. Index-linked are a more reliable hedge.

Protection against financial repression

Only asset that we believe is likely to deliver protection.

Sharpe Ratio Differentials by Macroeconomic Environment (1972 – 2022)

Source: *Journal of Portfolio Management* 49:4 March 2023.

Why index-linked?

Index-linked bonds have outperformed nominal bonds since the turn of the century. Why? Because the market systematically underestimates realised inflation

Index-Linked Bond – Total Returns (UK)

Index-Linked Bond – Total Returns (US)

Source: Bloomberg Finance L.P.

Why index-linked?

A key reason is that markets routinely underestimate inflation

Difference between UK 5Y Breakeven and subsequent realised inflation (% annualised)

Source: Bloomberg Finance LP.

Why index-linked?

Index-linked bonds perform well in scenarios where equities do not, and are the most reliable portfolio protector against stagflation

CG UK Index-Linked Bond Fund

Investment Approach

The principles underpinning our investment approach

Be honest

No greenwashing, no PR-led initiatives, no jargon. We believe in an accurate presentation of our activities not a marketing campaign.

One firm, one rule

Our standards apply to all the funds we advise. We do not have ethical and by implication unethical funds.

Ethics, not mathematics

There is no formula that can be applied in a uniform way to every situation. We emphasise judgement over simplistic third party ESG scoring systems.

Don't disinvest, engage

When investors have the influence to effect change, it is most valuable to encourage positive transition rather than engage in blanket disinvestment.

Targeted

As a small firm, we must focus our efforts where they will have the most influence, rather than taking a generalist approach.

Governance

Investors have multiple direct mechanisms to influence governance, so we primarily focus on governance even when the ultimate objective consists of other priorities.

Integration, not separation

The entire team is collectively responsible for stewardship activities, with the ultimate responsibility lying with the chief executive. We do not have a standalone responsible investment team.

Act, with humility

Every action results in both intended and unintended consequences. Reflect deeply on the risk that good intentions can lead to unintended negative outcomes.

Considerations in the investment process

Direct Government Securities

A majority of the assets held by the funds are invested in direct holdings of securities issues by governments including bonds, bills and cash.

When investing, we consider indices compiled by a range of NGOs and require sovereigns, at a minimum, to achieve strong rankings in at least four out of five of these criteria. In addition to using third party indices, we also overlay our own subjective assessments which typically leads to material additional exclusions.

As we manage funds that invest exclusively in US and UK bonds respectively these jurisdictions will always be included but other sovereigns are subject to these exclusion criteria.

ESG Criteria Applied

Index	Criteria
World Bank governance effectiveness index	Top quartile
World press freedom index	Good or satisfactory
Global freedom score	Free rating
UN human development index	Very high human development rank
Net zero by 2050 statement	Statement of intent by 2050 or earlier

Resultant Investable Universe

United Kingdom	Japan
United States	Canada
Germany	Australia
Sweden	New Zealand
Denmark
