Real Return Fund

Investment Manager's Report

For the six months ended 30 April 2018

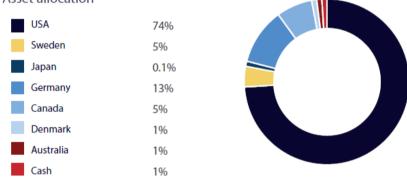

The performance calculations in the Investment Manager's Report are provided by Smith & Williamson, using Morningstar data. All other calculations in the Investment Manager's Report are based on the published NAV as at 30 April 2018.

Performance

	Six Months	One Year	Since Launch 8 March 2004
Real Return Fund (Total Return)	-3.34%	-4.46%	142.53%
Barclays Capital World (ex-UK) Inflation-Linked All Maturities (Total Return Index)	-1.81%	-1.48%	115.89%

Asset Allocation

Asset allocation

Fund duration is currently 6.1 years which against the duration of 5.9 years in April 2017.

All currency exposure is unhedged.

Fund Closure

Real Return Fund (the "Fund") is closed to further subscription. The decision to close the Fund to further subscription, effective 8 September 2014, is based on our view of constrained liquidity in some markets. Redemption rights are unaffected.

Review

The Bank of International Settlements ("BIS") is the closest thing there is to a global central bank. It is owned by 60 member central banks and acts as the prime counterparty for its member's transactions with each other. Given its unparalleled vantage point from which to survey the global macro economy, BIS research is essential reading even if a little soporific on occasions.

In its recent quarterly report the BIS reviews the impact of passive investment on the securities markets. Specifically it highlights the relationship between leverage and index weight in bond indices, highlighting statistically the perverse dynamic that index participants with the greatest leverage have the greatest weight within bond indices. Or to put it another way, bond indices overweight issuers with the lowest credit quality.

Real Return Fund

Investment Manager's Report

For the six months ended 30 April 2018 (Continued)

Review (continued)

The BIS did not point out a further dynamic, which is the cliff edge nature of index inclusion or exclusion. In mid 2012 at the height of the Eurozone crisis Moody's cut Italy's rating to barely above junk which resulted in Italian bonds being removed from the major World and European bond indices. This prompted global passive investors to sell Italian bonds en masse. After a precarious few years outside the indices, a serious buyer for Italian bonds emerged in the form of the ECB quantitative easing programme. The rating agencies correctly assessed that Mario Draghi would do "whatever it takes" to protect Italian interests and promptly upgraded Italian bonds which were reintroduced into the major indices on March 31st 2015. On that day Italian bonds went from 0% to 33% of the European inflation linked bond index, causing en masse buying by index purchasers. Given this pre-announced development the front runners were out in force, with 10 year Italian real yields hitting an all time low of negative 0.2% in February 2015 just prior to inclusion. The most extreme issue occurred with the illiquid 2062 index linked bond, which rose more than 60% between January 1st 2015 and March 31st 2015 and then promptly lost all this gain shortly after index inclusion. Needless to say none of these technical dynamics are in the interests of long term investors but a number of hedge funds enjoyed the round trip.

The real return fund currently invests in only three European issuers, all of whom are AAA rated; Germany, Sweden and Denmark. It has never invested in Italian bonds. There is no doubt that the low allocation to poorer credit quality European issuers has been a headwind since 2012 (although it was a tailwind up to that time). Most recently this has been due to the marked strength of the euro relative to the dollar, with currency dominating short term returns. It remains our belief that the higher yields and higher credit quality available in the US, mean TIPS are overwhelmingly the most attractive investment available to the fund.

Hence TIPS continue to have their maximum weighting within the portfolio, indeed recent dollar weakness relative to the Canadian dollar allowed for some modest additional purchases of the former and sales of the latter. Duration of the TIPS holdings were also modestly lengthened on rising real yields over the period. Elsewhere portfolio activity was limited, with relatively small additions to Swedish positions, as the Kroner weakened relative to the euro.

Outlook

Absent dramatic changes to market prices or external circumstances, material changes to the country weightings within The Real Return Fund are not expected. The USA remains the most attractive overseas market in terms of real and nominal yield, in addition to being the largest sovereign index-linked market. It is therefore likely to remain the largest weighting in the Fund.

Maturity Analysis

Fund duration is 6.8 years which against a duration of 6.1 years in April 2017.

Review

2018 seems highly likely to be the first year since 2011 when the Federal Reserve's preferred measure of inflation, the PCE Price Index, moves clearly and persistently above its 2% target. The immediate impetus for rising inflation is the lagged effects of higher oil prices and the decline in the dollar which feeds into higher import prices. Market expectations (as revealed by inflation swap pricing) are that these pressures are transitory and that inflation will move back to the 2% target in 2019.

The impact of currency and commodity price changes tend to be transitory, although there are a couple of candidates that could extend and amplify these goods led price increases. Firstly President Trump is engaged in very vocal negotiations with the Chinese regarding trade and has threatened to impose tariffs on a broad range of Chinese imports. Whilst it remains highly uncertain how these negotiations will develop, there is at least a chance that the outcome is a broad range of new tariffs on US imports. The second risk is further escalation of the oil price, if greater Western involvement in Syria ignites a wider regional or even global conflict. The risk of any single adverse scenario is low but the state of global tensions are such that the aggregate risks are elevated.

The Dollar Fund

Investment Manager's Report

For the six months ended 30 April 2018 (Continued)

Review (continued)

Of more significance is the domestic wage response to recent developments. The first quarter of 2018 has undoubtedly seen a slowing in global economic activity, however it is Japan and Europe that seem to be experiencing the most rapid cooling. The US appears to be continuing its above trend economic growth, absorbing economic slack at a fairly rapid pace. This is certainly the case in the jobs market where payroll gains continue to drive the unemployment rate lower resulting in firming wage pressures. This is the backdrop against which a huge fiscal stimulus is being added to the economy via President Trump's tax cuts.

This combination of rising transitory inflationary pressures, above trend economic growth and the fiscal stimulus has not passed the Federal Reserve by. The new Chairman, Jerome Powell, has made a series of hawkish statements with recent Open Market Committee minutes raising the prospect of monetary policy moving from an accommodative stance to being neutral or a restraining factor for economic activity. In his congressional statements Chairman Powell indicated short rates could rise faster than market expectations and that any market volatility associated with this would not be a key driver of policy. If there is no "Powell put" then arguably a further upside surprise in US inflation is amongst the most significant threat to a wide range of global risk asset prices.

Against this backdrop, nominal yields and real yields rose in the period leading to modest negative performance of the fund in dollar terms. This yield rise occurred mostly in shorter bonds, resulting in a flatter yield curve. This is consistent with the inflation swaps market in suggesting that investors believe inflation pressures are transitory. If these pressures prove to be longer lasting then the longer end of the real curve could well sell off and in response the fund would lengthen duration on lower long bond prices. Until that time fund duration will remain constrained at sub 7 years. The most significant impact on price in the period related to the sterling / dollar exchange rate, with marked weakness of the dollar and strength of the pound. Part of this relates to concerns around the growing twin deficits in the US, part relates to some more promising news regarding Brexit negotiations and part is due to technical momentum as a strong bull position has built up in the derivatives markets. Whilst short term currency forecasting is impossible, the US dollar does appear good value at current levels. The competitive level of the dollar may partly explain the robustness of the US economy whilst Europe and Japan start to slow.

Outlook

Over the longer term, it is our expectation that real yields will become negative to support reduction in debt levels. We are concerned that, in the short term, TIPS could be weak in sympathy with rising nominal yields caused by the Federal Reserve raising rates and inflation rising. Consequently Fund duration remains relatively short, but we are prepared to extend it on better values.

Asset Allocation

Asset allocation

Currency exposure is GBP 52%, USD 32%, EUR 8%, SEK 5%, JPY 2% and 1% in other currencies.

Fund Closure

The Capital Value Fund (the "Fund") is closed to further subscription. The decision to close the Fund to further subscription, effective 2 December 2011, is based on our view of constrained liquidity in some markets. Redemption rights are unaffected.

Review

Over the past year the fund's risk assets (equity, property and alternatives) performed very well delivering returns of 7% which reflected satisfactory outperformance of both the MSCI UK All Share and MSCI All World index of 0% and 2% respectively (all quoted in sterling). Unfortunately this outperformance was offset by sterling's relative strength and the US dollar's relative weakness which, combined with rising real yields, meant that substantially all of the gains in the risk assets were offset by losses in the holding of US TIPS.

The weakness of the dollar has confounded many observers, including the managers of your funds. While the graveyard of prognosticators is well populated with currency forecasters, there have been a number of relationships which have worked very well in the past. Chief among these is interest rate differentials, for example, between the 2Y Bund rate vs. the 2Y US treasury rate and the EUR/USD exchange rate. Over the past year this relationship has broken down.

The Capital Value Fund

Investment Manager's Report

For the six months ended 30 April 2018 (Continued)

Review (continued)

A number of explanations have been put forward in support of this. The first is that markets are concerned by the growing current account and fiscal deficits in the US and the weakness represents a reluctance on the part of the rest of the world to finance them. The second is the prospect of better growth in Europe relative to the US and the concomitant normalisation of monetary policy for the Euro-area. Third is the sign that emerging economies, particularly China and Russia, are seeking to "de-dollarise" threatening the dollar's status as the global reserve currency. In support of this last point, commentators cite the launch of a renminbi denominated oil futures contract in Shanghai.

None of these explanations alone is entirely convincing. Taking the first as an example, the all-time peak of the DXY dollar index occurred in December 1984, a time when the US was running – at the time – unprecedented current account and fiscal deficits, albeit from a much lower starting debt/GDP ratio. The most convincing explanation, though little more than axiomatic, is that the dollar is falling because the recent bout of global synchronised growth has spurred a desire for investors to sell dollars and acquire overseas assets.

This episode offers a timely remind that explanations can always be found to fit any narrative and that the post hoc ergo propter hoc fallacy abounds in financial markets. Humans delight in explaining their surroundings. This epistemological approach is very successful in explaining the natural world, however the prices of securities traded on public markets are the product of the actions of many thousands of individuals subject to – all too human – frailties.

Risk is not related to volatility but primarily is a function of price: expensive assets are risky, cheap assets are not. While the moves in the dollar over past year have been painful they have reduced the risk of the portfolio and it is hoped will offer the prospect of future positive returns, particularly since recent data point to global synchronised growth stuttering.

Outlook

The portfolio remains broadly spread and defensively positioned. The Fund's focus is return of, rather than return on, capital. Nominal return ambitions for the Fund are in the low single digits. While this may not appear very challenging, it is our belief that the present environment offers much risk and not much reward.

Asset Allocation

Asset allocation

Review

At the heart of the investment process through which the fund is managed is an attempt to assess the prospective returns of all major asset classes and then allocate to them accordingly. The hardest asset class to forecast is equities. As with most things, history is a good place to start. Robert Shiller, the Nobel Prize winning economist, maintains a data set of US stock market returns going back to 1871. The data reveal that total shareholder returns from owning US equities over the period, with dividends reinvested, were 6.5% real. This was made up of 4.3% from dividends, 1.7% from real earnings growth and 0.4% from changes in valuation. The contribution from changes in valuation, to state the obvious, can be either positive or negative. However valuations cannot continue to rise indefinitely so a prudent investor should expect, at a maximum, no contribution from this element.

The final source of return (0.2% per annum*) was the positive impact of stock-market fluctuations on reinvesting dividends. The magic of compounding means that reinvesting dividends in very low priced stocks (e.g. during the bear market from December 1968 to December 1974 when the real price of the S&P500 fell by 57% and the cyclically adjusted PE ratio fell to 8.3x) counts for more than the obverse of reinvesting meagre dividends in very high priced stocks.

This tells investors that those 6.5% returns were generated in part by those gut wrenching falls in the stock market. That is fine for an investor with an infinite time horizon – a university endowment perhaps – but is much less palatable for an individual to see a >50% fall in the purchasing power of their savings in a matter of months.

The CG Absolute Return Fund

Investment Manager's Report

For the six months ended 30 April 2018 (Continued)

Review (continued)

Bearing these observations in mind, what returns can a rational investor expect from US equities from here? The remaining elements of return are dividend yield, presently 1.9%, and real earnings growth. Real earnings growth historically has correlated with the proportion of earnings the companies in the index retain as a whole and correlated to the level of GDP growth. Taken together this means that the best case for US equities might reasonably be to return 1.5-3% per annum assuming no changes in valuation and no contribution from price volatility.

The proposition that US equities should return less in the future than they have in the past is not unreasonable. There are a number of reasons for this, including inter alia: i) until the second world war the US was essentially an emerging economy whose rapid industrialisation was coupled with a hunger for capital; ii) the cost of owning US equities, both taxes and expenses, have fallen dramatically; iii) future real interest rates are likely to be somewhat lower than in the past.

Even accepting that returns are likely to be lower in the future, current valuations seem so elevated that these reduced expectations appear likely to be dissappointed. It is said of the global economy that "when America sneezes the rest of the world catches a cold"; the same is true of asset prices. For as long as US equity markets offer poor prospective returns the overall weighting to equities in the fund will be constrained.

*Numbers do not add due to rounding

Outlook

The portfolio remains broadly spread and defensively positioned. The Fund's focus is return of, rather than return on, capital. Nominal return ambitions for the Fund are in the low single digits. While this may not appear very challenging, it is our belief that the present environment offers much risk and not much reward.

Notes to the Financial Statements

For the six months ended 30 April 2018

1. Organisation and Nature of Business

CG Portfolio Fund plc (the "Company") is an umbrella type open ended investment company with variable capital incorporated on 21 August 2002 under the laws of Ireland and is authorised in Ireland as an Undertaking for Collective Investment in Transferable Securities pursuant to the European Communities (UCITS) Regulations 2011 (as amended), (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) UCITS Regulations 2015 (the "Central Bank UCITS Regulations"). The Company was admitted to the official list of the Irish Stock Exchange on 5 March 2004 and commenced trading on the same date.

As at 30 April 2018 the Company has four sub-funds (the "Funds") and five share classes:

Name of the Fund	Share Class	Launch date
Real Return Fund	Class A	8 March 2004
The Dollar Fund	Class D	9 May 2009
The Dollar Fund	Class Hedged Shares	15 August 2016
The Capital Value Fund	Class V	4 June 2010
The CG Absolute Return Fund	Class M	23 May 2016

As mentioned in the Investment Manager's Report, Real Return Fund and The Capital Value Fund closed to new investors on 8 September 2014 and 2 December 2011 respectively.

The investment objective of Real Return Fund is to achieve long term capital appreciation and income growth by investing mainly in international government and corporate Index Linked Bonds, but from time to time Real Return Fund may also invest in conventional government and corporate obligations with the emphasis on investment grade bonds where applicable.

The investment objective of The Dollar Fund is to achieve long-term capital appreciation and income growth by investing mainly in U.S. Government and corporate Index Linked Bonds, in particular Treasury Inflation-Protected Securities (TIPS), but from time to time The Dollar Fund may also invest in conventional government and corporate obligations with the emphasis on investment grade bonds where applicable.

The investment objective of The Capital Value Fund is to achieve long term capital growth in absolute terms by investing in a spread of closed ended investment trusts focusing principally on larger and more liquid investment trusts, government and corporate bonds including Index Linked Bonds, all listed on a recognised market. Through investing in investment trusts, The Capital Value Fund will obtain exposure to global and domestic equity markets, real estate, infrastructure, commodities and precious metals.

The Capital Value Fund may also invest in other obligations of companies listed on a recognised market such as preferred shares, loan stocks, convertible bonds and warrants, as well as cash and money market instruments including cash funds. Through investing in convertible bonds and warrants, The Capital Value Fund will obtain exposure to global and domestic equity markets and may obtain exposure to real estate, infrastructure, commodities and precious metals. The Capital Value Fund will be global in its exposure and will not concentrate on any individual geographical region or industry.

The investment objective of The CG Absolute Return Fund is to achieve long term capital growth in absolute terms by investing in a spread of direct equities, exchange traded funds, open ended funds, closed ended funds, government and corporate bonds including Index Linked Bonds, all listed on a Recognised Market. Through investing in investment trusts and investment companies, the Fund will obtain exposure to global and domestic equity markets, real estate, infrastructure, commodities and precious metals.

The CG Absolute Return Fund may also invest in other obligations of companies listed on a Recognised Market such as preferred shares, loan stocks, convertible bonds and warrants, as well as cash and money market instruments including cash funds. The CG Absolute Return Fund does not acquire direct exposure to alternative asset classes (real estate, infrastructure, commodities and precious metals) instead it tends to acquire indirect exposure via open ended funds, ETFs, listed investment companies, Real Estate Investment Trusts ("REITS") and ordinary equities with substantial exposure to a given alternative asset class. Such entities, in turn, may issue convertible bonds or warrants. The fund may purchase such instruments and therefore, in turn, acquire indirect exposure to the underlying asset class. The CG Absolute Return Fund will be global in its exposure and will not concentrate on any individual geographical region or industry.

The Company has no employees (2017: none).

Notes to the Financial Statements

For the six months ended 30 April 2018 (Continued)

2. Principal Accounting Policies

The principal accounting policies applied in the preparation of the Financial Statements are consistent with those used in the prior periods.

The condensed interim financial statements have been prepared in accordance with IAS 34 'Interim Financial Reporting', and should be read in conjunction with the most recent annual report, which was prepared in accordance with International Financial Reporting Standards ("IFRS").

4. Cash and Cash Equivalents

Cash and cash equivalents comprises cash at bank held with The Northern Trust Company.

	Real Return Fund f		The Capital Value Fund f	Absolute Return Fund
30 April 2018	~	~	~	~
Cash and cash equivalents	9,724,520	1,844,371	9,838,299	5,777,797
31 October 2017				
Cash and cash equivalents	13,068,312	7,952,719	11,104,189	3,999,494

On 30 March 2015 the Central Bank of Ireland published two sets of regulations: Client Asset Regulations ("CAR") and Investor Money Relations ("IMR") which strengthens the safeguards around client assets and investor money. On 29 January 2016 a new bank account was set up in the Company's name in line with the Central Bank of Ireland requirements. Any subscription monies not yet applied to the Funds or that have been redeemed but not yet paid out from the funds will form the balance of this account. As at 30 April 2018 an adjustment was required to reflect this balance in the Financial Statements on all Funds.

Notes to the Financial Statements

For the six months ended 30 April 2018 (Continued)

4. Cash and Cash Equivalents (Continued)

As at 30 April 2018, the cash and cash equivalents on the Real Return Fund were increased by £59,478 which related to redemption charges, on The Dollar Fund they were increased by £712 which related to other payables, on The Capital Value Fund they were increased by £8,792 which related to payable for participating shares redeemed, and on the CG Absolute Return Fund they were increased by £1,201,878 which related to the following: £1,200,600 subscriptions received in advance and £1,278 other payables.

As at 31 October 2017, the cash and cash equivalents on Real Return Fund were increased by £16,613 which related to the following: £16,451 redemption charges and £162 other payables, on The Dollar Fund were increased by £23,567 which related to redemption charges and on the CG Absolute Return Fund were increased by £4,158 which related to subscriptions received in advance.

5. Fees and Other Expenses

Investment Management Fee

The Investment Manager receives a total fee of 1.00% per annum of the net asset value for The Capital Value Fund, 0.25% per annum of the net asset value of Real Return Fund, 0.30% per annum of the net asset value of The Dollar Fund Class D and Hedged Shares and 0.35% per annum of the net asset value of The CG Absolute Return Fund, accrued daily and payable monthly in arrears. The Investment Manager shall also be reimbursed for any out-of-pocket expenses incurred.

Administration Fee

The Administrator is entitled to 0.07% per annum of the net asset value of the Funds on the first £100m, 0.05% per annum on the next £150m of the net asset value of the Funds and 0.03% on the remainder of the net asset value of the Funds. This fee is accrued daily and payable monthly in arrears. The Administrator is also entitled to be reimbursed for any out-of-pocket expenses incurred.

Depositary Fee

The Depositary is entitled to 0.0325% per annum on the first £100m of the net asset value of the Funds, 0.0275% per annum on the next £150m of the net asset value of the Funds and 0.0225% on the remainder of the net asset value of the Funds. This fee is accrued daily and payable monthly in arrears. In addition, the Depositary is entitled to recover from the Funds out-of-pocket expenses and the fees and expenses of any correspondent appointed by the Depositary.

All fees received by the Investment Manager, Administrator and Depositary are disclosed separately in the Unaudited Statement of Comprehensive Income. Amounts payable at the period/year end were:

Directors Fees

The Directors are entitled to a Directors Fee of €16,000 each per annum. Richard Goody has agreed to waive his Director fee. The Directors fee for the period ended 30 April 2018 is £20,851 (€24,000) (30 April 2017: £21,202 (€24,000)) of which £13,974 (€16,000) (31 October 2017: £21,454 (€24,000)) is outstanding at the financial period end.

MLRO Fees

The Company has engaged David Burns of Carne Global Financial Services Limited to act as MLRO to the Company. The MLRO is entitled to receive an annual fee of €6,000 plus VAT and will also be reimbursed for out of pocket expenses incurred in the provision of their services to the Company. The MLRO fee for the period ended 30 April 2018 is £2,646 (€3,000) (30 April 2017: £2,525 (€3,000)). As from 1 May 2018 Bridge Consulting are fulfilling the MLRO function for a fee of €3,000 plus VAT per annum.

Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. Transaction costs for the period of £65,768 (30 April 2017: £93,713) are expensed in the Unaudited Statement of Comprehensive Income as part of the movement in the fair value of financial assets at fair value through profit or loss. Only transaction costs which are separately identifiable are disclosed.

6. Exchange Rates

The exchange rates used at 30 April 2018 and 31 October 2017 were as follows:

	30 April 2018	31 October 2017
	Exchange Rate to £ I	Exchange Rate to £
Australian Dollar	1.8247	1.7319

There are three significant nominee shareholders of the Real Return Fund who together hold 44.46% (31 October 2017 44.27%) of the Fund's shares. There are two significant nominee shareholders of The Dollar Fund who together hold 56.70% (31 October 2017 51.87%) of the Fund's shares. There are two significant nominee shareholders of The CG Absolute Return Fund who together hold 47.88% (31 October 2017 38.81%). There are two significant nominee shareholders of The Capital Value Fund who together hold 42.48% (31 October 2017 42.68%). Nominee shareholders are often pooled accounts which hold the assets of multiple beneficiaries.

Notes to the Financial Statements

For the six months ended 30 April 2018 (Continued)

8. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the occurrence of a "chargeable event". A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares. No Irish tax will arise on the Company in respect of chargeable events in respect of:

- a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended are held by the Company or where the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

9. Shareholders' Funds

The Company has an authorised share capital of 40,000 management shares with a par value of £1 each and 1,000,000,000 redeemable participating shares of no par value. Management shares do not entitle the holders to any dividend and on a winding up entitle the holder to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. There are only 2 management shares in issue, held by CG Asset Management Limited.

The Management Share does not entitle the holder to participate in dividends or other distributions of profits or assets of the Company whilst there are any Redeemable Participating Shares in issue. Each of the Redeemable Participating Shares entitles the shareholder to participate equally on a pro rata basis in the dividends and net assets of the Company.

Shares are available for issue as Class A shares for Real Return Fund, Class D and Class Hedged shares for The Dollar Fund, Class V shares for The Capital Value Fund and Class M shares for The CG Absolute Return Fund. Classes A, D, Hedge Share, V and M shareholders will receive a dividend.

Transactions in Redeemable Participating Shares for the period ended 30 April 2018 and year ended 31 October 2017 were as follows:

	30 April 2018	31 October 2017

10. Portfolio Changes

A schedule of portfolio changes is included on pages 54 to 59, of all material changes in purchases and sales during the period.

11. Connected Persons

The Central Bank of Ireland's UCITS Regulations require that any transactions carried out with a UCITS fund by a management company or depositary to the Company, the delegates or sub-delegates of the management company or depositary, and any associated or group of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arms length and must be in the best interests of the shareholders. The Directors are satisfied that transactions with connected persons entered into during the period were carried out as if negotiated at arm's length and in the best interests of the shareholders.

12. Fair Value Measurement

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices on the period end date. The quoted market price used for financial assets and liabilities held by the Company is the last traded price for investment companies, commodities and equities, mid price for all debt securities apart from US debt securities which are bid priced. If a significant movement in fair value occurs subsequent to the close of trading on the year end date, valuation techniques will be applied to determine the fair value.

Notes to the Financial Statements

For the six months ended 30 April 2018 (Continued)

12. Fair Value Measurement (Continued)

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

The Company categorises investments using the following hierarchy as defined by IFRS 13.

- Level 1 valued using quoted prices (unadjusted) in active markets for identical assets.
- Level 2 valued by reference to valuation techniques using observable inputs other than quoted prices included within level 1.
- Level 3 valued by reference to valuation techniques using inputs that are not based on observable market data.

Financial instruments classified within Level 3 have significant unobservable inputs, as they trade infrequently. As observable prices are not available for these securities, the Company has used valuation techniques to derive the fair value. Level 3 instruments include corporate bonds, zero dividend preference shares and investment company shares which have been delisted and are in liquidation.

The fair value of investment companies classified within Level 3 may be based on estimated net asset values at the Unaudited Statement of Financial Position date. The estimated net asset value is derived from the last estimate published by the investment company and adjusted for any liquidation payments since received and/or discounted to reflect risks inherent in the investment company's own valuation of its underlying assets. The performance of the investment companies and net asset value used may be unaudited. As a result the estimated net asset value used may not reflect the final net asset value of such investment companies received. The Investment Manager monitors the difference between the estimated net asset values used and the final net asset value received and reports regularly to the Board of Director.

The following table sets out fair value measurements using the IFRS 13 fair value hierarchies:

30 April 2018

Notes to the Financial Statements

For the six months ended 30 April 2018 (Continued)

12. Fair Value Measurement (Continued)

Transfers are deemed to take place at the beginning of the period.

All realised and change in unrealised gains and (losses) for level 3 investments included in the table above are reflected in the Unaudited Statement of Comprehensive Income. The unrealised gains and (losses) on investments held by the Funds at 30 April 2018 and 31 October 2017 and reflected in the Unaudited Statement of Financial Position were as follows;

	30 April 2018	31 October 2017
	£	£
The Capital Value Fund	455,294	(340,583)
The CG Absolute Return Fund	(1,878)	4,645

A sensitivity analysis for level 3 positions was not presented in the current period or prior year, as it was deemed that the reasonable changes in inputs, for the non-derivative level 3 securities, held would not be significant. There is no additional risk over and above those risks already identified in the financial statements.

13. Distributions

The following distributions were paid during the period ended 30 April 2018:

14. Soft Commissions

There were no soft commission arrangements during the period (31 October 2017: Nil).

15. Efficient Portfolio Management

The Company may employ (subject to the conditions and within the limits laid down by the Central Bank of Ireland) techniques and instruments relating to transferable securities and money market instruments, provided that such techniques and instruments are used for efficient portfolio management purposes. Such techniques and instruments may also include foreign exchange transactions, which alter the currency characteristics of transferable securities held by the Company. The Company may also employ (subject to the conditions and within the limits laid down by the Central Bank of Ireland) techniques and instruments intended to provide protection against exchange risks in the context of the management of its assets and liabilities. The Company did not employ any efficient portfolio management techniques during the period.

16. Financial Derivative Instruments

The Dollar Fund, The Capital Value Fund and The CG Absolute Return Fund used financial derivative instruments during the reporting period. The Capital Value Fund and The CG Absolute Return Fund held convertible bonds and The Dollar Fund held forward currency contracts during the period ended 30 April 2018 and year ended 31 October 2017.

The total value of these positions as at 30 April 2018 is £7,310,654 or 2.67% on The Capital Value Fund (31 October 2017: £8,528,232 or 3.02%), £1,016,755 or 1.21% on The CG Absolute Return Fund (31 October 2017: £514,140 or 1.08%) and £3,015,360 or 0.53% on The Dollar Fund (31 October 2017: £3,994,322 or 0.63%).

17. Net Asset Value

The net asset value per redeemable participating share of the Company at the period end is determined by dividing the value of the net assets of the Company by the total number of redeemable participating shares in issue at the period end.
